dormakaba 

About us

dormakaba India Private Limited was established in 1997 and is the head office for dormakaba's operations in South Asian markets. With over 150 years of experience in everything to do with access and security, we continue to innovate and deliver the best products, solutions and services to our customers, around the globe.

Today's dormakaba is the result of the merger between two well-established brands – DORMA and KABA, both known for their expertise in access solutions. What we do is always focused on your needs as our customers, partners, and users. Our constant scouting of and seeking out trends is the basis for our development of future-oriented solutions. We go the extra mile to ensure your satisfaction and set high standards in terms of security, quality, and reliability. We are committed to continuously

developing solutions that generate genuine added value for our stakeholders. Trust is our key corporate value, so you can rest assured that you are in good hands.

Discover the trends that shape our industry through the eyes of our experts, from urbanization to sustainability, architecture to technology.

More than 15,000 employees around the world bring their knowledge, expertise and skills to the table for your solution. We have a comprehensive portfolio of products and services for security and access for rooms and buildings. We partner with you in every place that matters. We are there when you need innovative, reliable access and security solutions – in hotels, shops, sporting venues, airports, hospitals, in the home or at the office.

Electric Strikes

DES 400 - Standard

Heavy Duty Electric Strikes Series DES 400 - Symmetrical electric strike to meet the highest safety standards; holding force > 10,000 N; suitable for left-handed and right-handed doors; stainless-steel latch and strike plate; voltage: 12/24 V DC at low power consumption of 200/100 mA; Users may switch from failsafe to fail-secure mode without having to disassemble the electric strike. Available with optional monitoring function: Feedback contacts for latch position and door status (open/closed), anti-tamper contact on the back of the housing for sabotage monitoring.

Dimensions (W x H x D):

Approx.137 x 25 x 23 mm (without strike plate).

Strike plate: 179 x 29 x 3 mm)

SVP 6xxx Series Panic switch lock with automatic locking action, versions for narrow stile (67xx/68xx) or wide stile doors (62xx/63xx), electrically monitored, with split follower, electrically-activated outside handle and mechanical sequential control. With status monitoring for detecting "locked" (> 90 %), "unlocked" (< 10 % of the latch bolt path), "door open/ closed" (via trigger) as well as "handle operation/emergency unlocking" and "cylinder contact". When there is no power, the outside handles are disengaged (fail secure) or engaged (fail safe). The outside handle is engaged or disengaged by activating the solenoid (for example, via the access control system). The lever handle is always engaged in the direction of escape. Activation of the outside handle is effected via a GND contact by means of a potential-free NO (operating current) or NC (closed-circuit current). Permanently open mode possible (permanent engagement of outside handle, e.g. for daytime mode). Two-point locking activated by pre-loaded spring when door closes.

Non-handed trigger (24 mm forend versions can be used DIN L/R). Unlocking from the outside using key or engaged outside handle.

SVZ 6xxx Series Access control lock with automatic locking action, electrically monitored, with single follower, electrically-activated outside lever handle in operating current version or closed-circuit current version, and mechanical sequential control. With status monitoring for detecting "locked" (> 90 %), "unlocked" (< 10 % of the latch bolt path), "door open/closed" (via trigger) as well as "handle operation/emergency unlocking" and "cylinder contact". When there is no power, the lever handles are disengaged (operating current) or engaged (closed-circuit current). By means of actuating the solenoid in the lock (e.g. via the access control system) the lever handles can be engaged or disengaged. Activation of the lever handle is effected via a GND contact by means of a potential-free NO (operating current) or NC (short-circuit current). PERMANENTLY OPEN mode possible (permanent engagement of lever handle, e.g. for daytime operation). Connection universal to 12V DC/24V DC, power input: max. 0.4 A, maximum load current 30 V DC, 100 mA. Twopoint locking activated by pre-loaded spring when door closes. Non-handed trigger (24 mm forend versions can be used DIN L/R). Unlocking with a key or lever handle (lever handle can be engaged). Steel bolt, projection 20 mm. 9 mm square follower. Corrosion-protected lock case in DIN dimensions, complete with forend and strike plate in stainless steel, included in delivery.

SVP Locks

SVP 2000 DCW® Motorised panic lock with automatic locking action and electronic sequential control. Possible operating modes: direct by pulse activation, with external control unit SVP-S 3x and SVP-S 4x (for full functionality) or via DCW® bus or CAN bus to TMS, Saferoute and/or ED 100/250, visual signaling through integrated LED for the lock parameters and failure status. LED status display indicates error messages, such as incorrect operating voltage or BUS connection interrupted and more! With status monitoring for detecting "locked" (> 90 %), "unlocked" (< 10 % of the latch bolt path), "door open/closed" (via trigger) as well as "handle operation/emergency unlocking" and "cylinder contact". Two-point locking activated by pre-loaded spring when door closes. Universal trip latch (24 mm forend versions can be used LH or RH). Emergency unlocking using lever handle in accordance with EN 179 or panic bar in accordance with EN 1125, as well as a transmission function for unlocking from the outside using keys. Steel latch bolt 20 mm projection, 9 mm square-section follower. Corrosion-protected lock case in DIN dimensions, complete with forend and strike plate in stainless steel, included in delivery. Connection to 24 V.

SVP 2XXX DCW® F Series - Panic motor lock with automatic locking action and mechanical and electronic sequential control. Suitable for fire and smoke doors through an integrated PR module, without a permanently open function. Possible operating modes: direct by analog activation, with external control unit SVP-S 3x DCW® (Switzerland) and SVP-S 4x DCW® (stand-alone with full functionality) or via DCW® bus or CAN bus to TMS, Saferoute and/or ED. LED status display indicates error messages, such as incorrect operating voltage or BUS connection interrupted and more! Duisburg function: compatible with all kinds of cylinders, even electronic and free wheel cam cylinders. With status monitoring for detecting "locked" (> 90 %), "unlocked" (< 10 % of the latch bolt path), "door open/ closed" (via trigger) as well as "handle operation/emergency unlocking" and "cylinder contact". Two-point locking activated by pre-loaded spring when door closes. Non-handed trigger (24 mm forend versions can be used DIN L/R). Emergency unlocking using lever handle in accordance with EN 179 or panic bar in accordance with EN 1125, as well as a transmission function for unlocking from the outside using keys. Steel deadbolt 20 mm projection, 9 mm square-section follower. Corrosion-protected lock case in DIN dimensions, complete with forend and strike plate in stainless steel, included in delivery. Connection to 24 V. Uniform connection using the SVP-A 1100 connection cable (to be ordered separately).

SVA Locks

SVA 5xxx series lock is an active emergency-escape lock with automatic locking mechanism for the active door leaf in double-leaf door systems with optimised mechanical sequential control. Duisburg function: compatible with EPC, even electronic and free wheel cam cylinders. Two-point locking activated by pre-loaded spring when door closes. Universal trip latch (270 x 24 mm faceplate versions can be used for DIN left and right). Emergency unlocking using the lever handle or panic bar according to EN 179, EN 1125 and EN 12209. Panic function for unlocking from the outside using a key. Steel bolt with 20 mm projection, 9 mm square-section follower. Corrosion-protected lock case to DIN dimensions, complete with faceplate and strike plate in stainless steel included in delivery.

SVA 4xxx series lock is an active emergency-escape lock with automatic locking action for double-leaf door systems, electric monitoring and optimised mechanical sequential control. With status monitoring for detecting "locked" (> 90 %), "unlocked" (< 10 % of the latch bolt path), "door open/closed" (via trigger) as well as "handle operation/emergency unlocking" and "cylinder contact". Two-point locking activated by pre-loaded spring when door closes. Non-handed trigger (24 mm forend versions can be used DIN L/R). Emergency unlocking by lever handle, change to unlocking function with key access from the outside. Steel bolt, projection 20 mm. 9 mm square-section follower Corrosion-protected lock case in DIN dimensions, complete with forend and strike plate in stainless steel, included in delivery. Certified in accordance with EN 179 and EN 1125 for use with panic door fittings.

SVA 6xxx series lock is an active microswitch-monitored emergency-escape lock with automatic locking action for double-leaf door systems, versions for narrow stile (67xx/68xx) or timber doors (62xx/63xx), electrically monitored, with split follower, electrically-activated outside lever handle and optimised mechanical sequential control. With status monitoring for detecting "Locked" (> 90%), "Unlocked" (< 10% of the latch bolt path), "door open/closed" (via trip latch) as well as "Lever handle operation/emergency unlocking" and "Cylinder contact". When there is no power, the outside handles are disengaged (operating current) or engaged (closed-circuit current). The outside handle is engaged or disengaged by activating the solenoid (for example, via the access control system). The lever handle is always engaged in the direction of escape. Activation of the outside handle is effected via a GND contact by means of a potential-free NO (operating current) or NC (closed-circuit current). Permanently open mode possible (permanent engagement of outside handle, e.g. for daytime mode). Two-point locking activated by pre-loaded spring when door closes. Non-handed trigger (24 mm forend versions can be used DIN L/R). Unlocking from the outside using key or engaged outside handle. Steel bolt, projection 20 mm. Split 9 mm square-section follower. Corrosion-protected lock case in DIN dimensions, complete with forend and strike plate in stainless steel, included in delivery.

SVP-S - Motor Control Unit

SVP-S 34 DCW®

83014090 ■ **70922034** 99,697.00 18%

SVP-S 34 DCW control unit to operate SVP 2000 DCW or M-SVP 2200 DCW emergency escape motor locks with automatic locking action in stand-alone mode but with full range of functionality. This control unit offers various inputs and outputs, no configuration via Software required. Ready for motorised locking and unlocking of door via access control systems (by others), Control unit and lock are linked via DCW system bus. Inputs: Activation of the motor lock to realize a short-term unlocking or permanent unlocking, Day-latch function (M-SVP only), Smoke detector, door contact (SVP only). Outputs (potential free): locked, unlocked, door closed, lever handle operated, cylinder contact, trigger latch, common alarm

SVP-S 44 DCW®

83014090 ■ **70922044** 1,04,792.00 18%

SVP-S 44 DCW control unit to operate SVP 2000 DCW or M-SVP 2200 DCW emergency escape motor locks with automatic locking action in stand-alone mode without DORMA TMS (building management system), ready for motorised locking and unlocking of door via access control systems (by others), Control unit and lock are linked via DCW system bus. If required, you may link the control unit via LAN/LON. Extended parameterisation, visualisation and use of access control function via integrated RS 232 interface/LAN/LON by means of TMS software/TMS software basic (ex version 45). Inputs: Activation of the motor lock to realize a short-term unlocking or permanent unlocking, Day-latch function (M-SVP only), Smoke detector, door contact (SVP only). Outputs may be configured via TMS Soft. Outputs: locked/unlocked, door closed, lever handle operated, common alarm

1.1

The listed price does not include freight, unloading charges to delivery place.

1.2

The GST tax rate applicable subject to change as per the government notification.

2

The cost of freight from Chennai to delivery place is extra.

3

Products, finishes, design are subject to change without any prior intimation.

4

The sketches / drawings / images appearing in this price list have been included solely for guidance purposes only. They are not true to scale and do not represent any precise or binding design of the products!

5

domakaba India reserves the rights to alter the prices if there is a change in the cost of raw materials and exchange fluctuation.

6

All offers made to the end users should be checked for product availability, usage, prices and minimum order quantity, etc.

7

Mode of shipment, payment terms to be discussed and agreed before placing the order and is directly related to quantities

8

Warranty : One year against manufacturing defects subject to installation as per domakaba standards and by domakaba India certified technicians.

9

The validity period of the price list also applies in the case of products that are not included in the price list. All products are subject to technical modifications and colour variations without notice. As of the date of publication, this price list supersedes all preceding price catalogues, price lists and price agreements, which therefore lose their validity. All the information provided is subject to error and printing mistakes, for which no liability will be accepted.

10

The delivery and dispatches will be made as per the address mentioned in Purchase Order only.

11

Please refer technical catalogue for installation instruction and glass preparation.

12

As a Policy domakaba India stocks most of the fast moving items based on the past movement and trend. Hence please check with domakaba India for stock availability before giving commitment to customer with regard to deliveries. STO (STOCK to Order) Items will be dispatched in 2 working days from the date of receipt of order confirmation (Subject to receipt of Signed Order Acceptance and no payment overdue). MTO (Made to Order) items will be dispatched only after production / manufacturing. Please seek confirmation of delivery date prior to order placement. Items for which no stock is maintained is defined as "AVAILABLE ONLY ON REQUEST - BACK TO BACK ORDER".

13

domakaba India reserves right on price fixation to customer on case to case basis.

14

Any claims on the discrepancy of materials should reach dormakaba India within 7 days from the date of consignment at your end. No claim will be entertained beyond 7 days.

15

Samples are charged as per the prices given in the price list. In the event of samples being returned in their original condition, a credit note is issued for the original price charged.

16

STO & MTO deliveries are derived based on the average movement of the product. Kindly intimate well in advance or any project orders or bulk quantity orders.

17

Lead time for back to back ordered materials will be confirmed at the time of placing the order. If materials required by AIR, AIR freight charges from factory to India will be extra based on the actual order quantity.

18

This price list supercedes all other price lists issued earlier and is effective from 1 AUGUST 2022.
